

PRISMA

An end-to-end data mining platform that turns raw datasets into **clear, actionable insights**, no data science degree required.

The Problem

Data Without Direction

Slow, Technical Workflows

Delayed Decisions

Why It Matters

Faster Decisions

Reduced Costs

Trend Detection

Our Solution

PRISMA

Upload a dataset, and the system automatically prepares the data, runs analysis, and delivers plain-language results.

What Users Get

AI-Powered Preprocessing

One-Click Analysis

Plain-Language Insights

Downloadable Reports

Clean, User-Friendly Interface

How It Works

1

Upload Data

User imports a raw dataset.

2

Smart Analysis

System selects a compatible method.

3

Results Generated

Insights, summaries, and visuals appear.

4

Review & Export

User reviews findings and downloads.

Main Outputs

Insight Summaries

Structured Results

Visual Diagrams

Markdown Report

Current Limitations

Data Quality Dependency

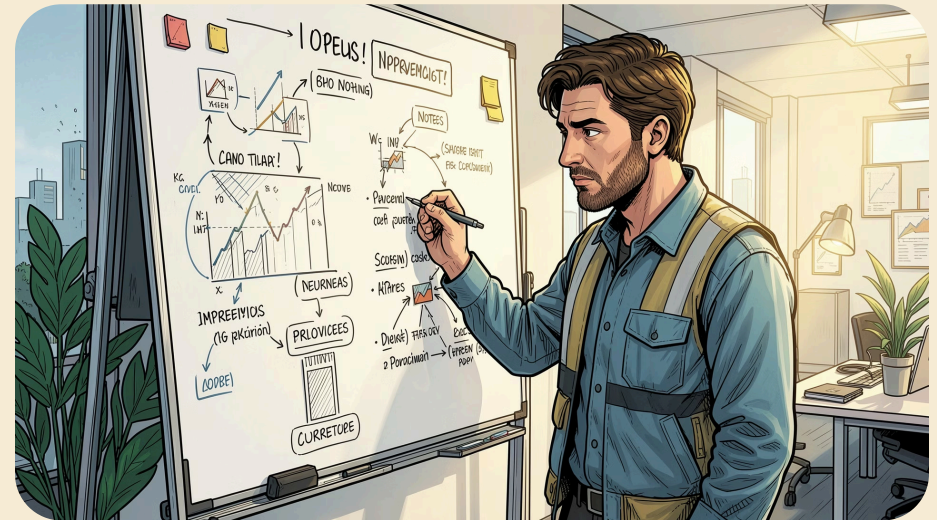

Automated Choices Need Review

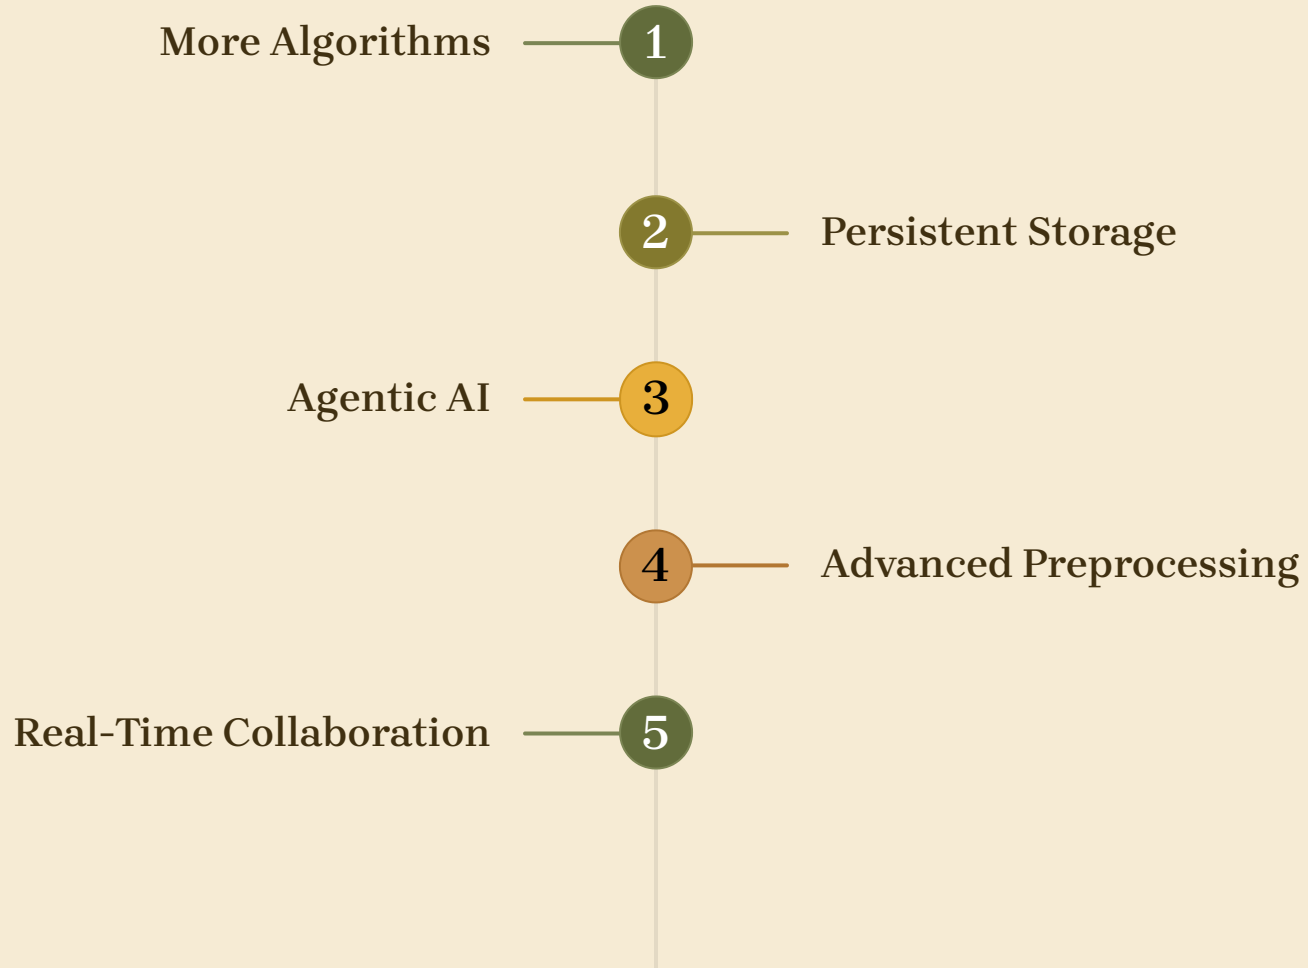

No Persistent Sessions

Forecasting Accuracy Limitations

What's Next

Start Turning Data Into Decisions

Prisma gives every team the power of advanced data analysis — without the complexity. Upload. Analyze. Decide.

Fast

From upload to insight in minutes.

Automated

AI handles the heavy lifting.

Exportable

Polished reports, ready to share.
